PROFESSIONAL SUMMARY

Engineering student and Dalyell Scholar at the University of Sydney with industry consulting experience delivering technology and process improvement solutions for engineering clients. Experienced in stakeholder engagement, project coordination, business analysis, and translating operational requirements into practical technical solutions. Proven ability to collaborate with multidisciplinary teams, communicate with technical and non-technical stakeholders, and deliver client-focused outcomes. Passionate about engineering consulting and eager to contribute strong analytical, communication and problem-solving skills to deliver meaningful outcomes for clients.

EDUCATION

Bachelor of Engineering Honours (Software Engineering) | University of Sydney 2024-Expected Nov 2027

Engineering Data Science Specialisation | Dalyell Scholar

Awards: Vice-Chancellor's International Scholarship | Sydney International Student Award

CONSULTING & PROJECT EXPERIENCE

Engineering Consultant (Client Liaison) | Jacaranda Flame Consulting x Hanlon Industries Jun 2026- Jul 2026

- Partnered with Hanlon Industries to analyse operational workflows and delivered digital solutions that improved production and transport management processes.
- Led weekly client workshops, translating business requirements into prioritised technical deliverables while coordinating communication between stakeholders and the project team.
- Owned the end-to-end delivery of a transport management workstream, leading the solution from requirements gathering and prototyping through implementation, testing, and final client handover using Agile methodologies.
- Prepared executive presentations, technical documentation and implementation recommendations, effectively communicating project outcomes to technical and non-technical stakeholders.

Consultant | Practera x Baron Consulting Group Australia Mar – Apr 2026

- Collaborated within a multidisciplinary consulting team to deliver an industry project for Baron Consulting Group Australia, coordinating project planning, solution development and stakeholder engagement.
- Conducted market research and data analysis to develop an evidence-based strategic framework addressing client business objectives.
- Presented data-driven insights and recommendations to client stakeholders through professional reports and presentations.

LEADERSHIP & PROFESSIONAL EXPERIENCE

Coding Instructor | Code Camp Oct 2024- Present

- Deliver engaging programming workshops for primary and secondary school students, adapting technical concepts to suit diverse learning needs.
- Foster problem-solving, collaboration, and confidence by mentoring students through project-based learning in an inclusive classroom environment.

Engineers Australia Student Ambassador | Engineers Australia Aug 2025- Present

- Represent Engineers Australia across the University of Sydney by promoting professional development opportunities and strengthening engagement between students and industry.
- Collaborate with ambassador teams to coordinate outreach initiatives and deliver events that encourage student participation in the engineering profession.

Engineering Lead Mentor | University of Sydney May 2025- Present

- Lead a team of approximately 20 mentors supporting over 150 first-year engineering students through mentoring initiatives, faculty events and ongoing guidance.
- Coordinate mentor communications, training activities and Welcome Day programs while fostering collaboration, leadership and student engagement.

Treasurer | Women in Technology USYD Nov 2024- Nov 2025

- Managed the society's largest-ever budget supporting 600+ members, overseeing budgeting, reimbursements, reconciliations and Financial Reporting.
- Planned and monitored budgets across ~20 events, working with event leads to evaluate priorities, financial constraints and resource allocation.
- Supported a 4x increase in society membership through strategic financial planning and effective committee collaboration.
